March 30th, 2020

Dear Customer:

Due to the age of the overhead electrical distribution system, higher demand for electricity and our greater plan to enhance the electrical infrastructure in the City of Oshawa, we find that it is necessary to replace the overhead infrastructure in your area.

We have construction scheduled to begin in the summer of 2020, in the **area of Simcoe St N – from the 407 ETR to Columbus Rd E. (OPUCN Ref# C20-211)** which will remain in construction for a period of 3 to 4 months.

Information and maps related to areas which are part of our capital rebuild plan for 2020 is available on our website at <https://www.opuc.on.ca/residential/capital-rebuild-plan/>

Oshawa Power will be responsible for all site restoration work which would result from our capital rebuild program.

We apologize for any inconvenience this work may cause.

In case of any questions or concerns, please feel free to contact us.

Sincerely,

Zeeshan Syed, P.Eng

Supervisor, Capital Design | Oshawa Power
